## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin et al. ("Martin").

As per claim 1, Martin teaches an image capture method, the method comprising activating an interface element for a computing system having a control logic and a display to position a capture interface element over a portion of an image presented on said display by said computing system and capturing said portion to an image transfer system external to said computing system using said computing system (figs. 2 and 4-8; paragraphs [0051], [0057] and [0078]; users activate an interface element upon a kiosk display to select a stamp pattern for printing).

Claim 2 is similar in scope to claim 1 and is therefore rejected under similar rationale.

As per claim 3, Martin teaches an information distribution system comprising a kiosk having a display presenting one or more images from a

computing system and an printer/interactive pad transfer system, coupled to said computing system, to capture one or more of said one or more images by touching/proximating an element of said interactive pad transfer system to a portion of said display presenting said one or more images to be captured (figs. 2 and 4-8; paragraphs [0051], [0057] and [0078]; users activate an interface element upon a kiosk display to select a stamp pattern for printing).

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nardozzi et al. (US 2003/0229538 A1) teach a method and apparatus for ordering photofinishing goods an/or services.

Arledge, Jr. et al. (US 6535294 B1) teaches a hypertext button for selection by an end-user for printing and purchasing.

Davidson et al. (US 5,615,123) teaches a kiosk for creating and producing custom card products.

### ***Inquires***

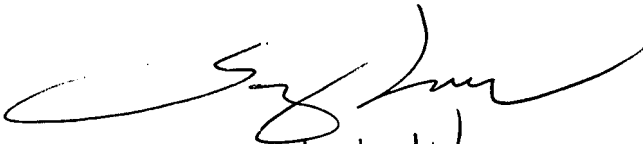

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Lê Nguyen whose telephone number is **(571) 272-4068**. The examiner can normally be reached on Monday - Friday from 7:00 am to 3:30 pm (EST).

Art Unit: 2174

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine Kincaid, can be reached at (571) 272-4063.
